📍 Banasthali Vidyapeeth, Rajasthan

SUMMARY

Third-year Information Technology undergraduate (9.61 CGPA, expected graduation 2028) focused on agentic AI systems, generative AI applications, and cybersecurity automation. Built two hackathon-grade platforms — an offline SIEM-SOAR incident response system and an autonomous email productivity agent — as working, end-to-end software rather than prototypes.

PROJECTS

Act Aware — AI-Powered Cyber Incident Response Platform March 2026

Barclays Hack-O-Hire Hackathon · Team of 5

- Built a fully offline SIEM-SOAR pipeline: log normalization, UEBA/anomaly detection (ensemble ML), graph-based attack modeling, fidelity scoring, and local LLM-based response-playbook generation.
- Contributed across multiple pipeline stages with primary ownership of SOAR response execution and evaluation; every action RBAC-gated with full decision provenance.
- **Stack:** Python, FastAPI, Elasticsearch, PyOD, tsfresh, NetworkX, LangGraph, Ollama, React/TypeScript.

Autonomous Email Productivity Agent January 2026

HackCelestia Hackathon

- Designed an agentic AI system for context-aware email prioritization, LLM-based summarization, and automatic task/schedule extraction.
- Built both frontend and backend; contributed to overall system design.
- **Stack:** React, TypeScript, Tailwind CSS, Supabase (Postgres, Edge Functions, Auth).

OrbitDesk — Local-First Support Agent August 2026

AI Engineer Internship Assignment, Tantrabodh AI · Solo project

- Built a fully offline LangGraph agent (triage → retrieval → generation → verification) with a 16-test automated suite and benchmarked latency.
- **Stack:** Python, LangGraph, LangChain, sentence-transformers, Qwen2.5.

SKILLS

- **Languages:** Python, C, C++, JavaScript, TypeScript
- **Backend:** FastAPI, REST APIs, Supabase
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **Data:** MySQL, Elasticsearch
- **AI / Agentic Systems:** LangGraph, LangChain, LLM app development
- **Security & ML:** Anomaly detection, UEBA, RBAC design

EDUCATION

Bachelor's in Information Technology — Banasthali Vidyapeeth, Rajasthan July 2024 – Expected 2028

9.61 CGPA

12th — Maharashtra State Board, Nirala Junior College, Nagpur 2023 – 2024

10th — C.B.S.E. Board, Montfort Higher Secondary School, Ballarpur 2021 – 2022

ACHIEVEMENTS & CERTIFICATIONS

Barclays Hack-O-Hire Hackathon Built Act Aware as part of a 5-member team.	March 2026
HackCelestia — 48-Hour Hackathon Designed and presented an autonomous email productivity agent.	January 2026
Certificate Course for Modern European Language (French) Distinction, university-conducted examination.	May 2025
Le Grand Concours 2024 — French Language Competition 94/100, Position IV nationally.	October 2024
